SUMMARY

A dedicated computer science graduate making a career change from retail into software development, keen to learn and collaborate on Business to Business (B2B) projects. Experience in developing tools aimed at students to improve efficiency in assignment execution and support network learning goals. Have led multiple retail teams, up to 15 members, and strategised with mid and senior leaders to complete retail working goals within tight time and resource constraints.

PERSONAL PROJECTS

github.com/labujaber1/LitRevResourceMVP

Conceptualised and constructed a C# .NET Core 3.1 desktop application to store and organise resources, including resource notes, to be used and referenced in assignments. Uses SQL Express, MVP design and GIT.

github.com/labujaber1/NWConfigScriptor

Designed and implemented a C# .NET Core 3.1 desktop application to create configuration scripts, update configuration files, and backup/restore configuration files on a directly connected router and in GNS3. Split into 3 decoupled parts, with the first being able to use with Packet-Tracer. Used GIT for version control.

EDUCATION

BSc (Hons) Applied Computer Science | Anglia Ruskin University @College of West Anglia
09/2020 – 06/2023
Awarded 1st Class Honours Degree with all assignments planned, executed, and submitted early with no re-submissions. Modules scored between 70% and 93%. Attendance 96% to 100%.

Level 3 Computer Science | ARU @CWA
09/2019 – 07/2020
Awarded Distinction. 1 merit and the rest distinctions.

CORE SKILLS

Main Languages: C# (.NET Core), Java and Python.   Web development: HTML, CSS, and JavaScript.

Main databases: MySQL, SQL Express, and SQLite.   Other: Git and Agile development (practised in group projects).

WORK EXPERIENCE

Team Leader and GA | Tesco Plc
03/2004 – 06/2019 TEAM-LEADER (NIGHTS)
Supported department managers by directing up to 15-member teams to meet a nightly 70% store filling split requirement.

- Collaborated with 3 other team leaders to complete department objectives and reaffirm the continued value of the role to the business.
- Implemented staff training strategies and consistently achieved 100% team compliance with periodical service, health and hygiene, and fire safety company training.
- Instigated personal support to assist the warehouse member by taking in deliveries, delivering stock to and from filling teams, and prepare shop floor in time for day-trading.
- Repeatedly analysed and re-sited fast-moving/promotional items to exceed sales beyond its location capacity and reduce warehouse stock holding by 50%.
- Ensured staff rotas and payroll attendance reports were completed thoroughly and on-time to reduce colleague wage discrepancies by 15%.

GA – Replenish, present working area, and organise returns. Additionally coordinated with the stock-control department to drive accurate item system levels for improved customer availability.
